Euler velocity section
$r_1 = (-1, 0)$, $r_2 = (+1, 0)$, $r_3 = (0, 0)$
$p_1 = p_2 = (v_1, v_2)$, $p_3 = -2(v_1, v_2)$
$L_z = 0$ identically
Equilateral section (this work)
$r_k = \hat{n}_k/\sqrt{3}$ at 2π/3 spacing
$v_k = R(2\pi k/3)u$, $u \in \mathbb{R}^2$
$L_z = \sqrt{3}\, u_y$ (zero only on $u_y = 0$ axis)
