

Energy breathing — kinetic and potential energy trade off; total conserved

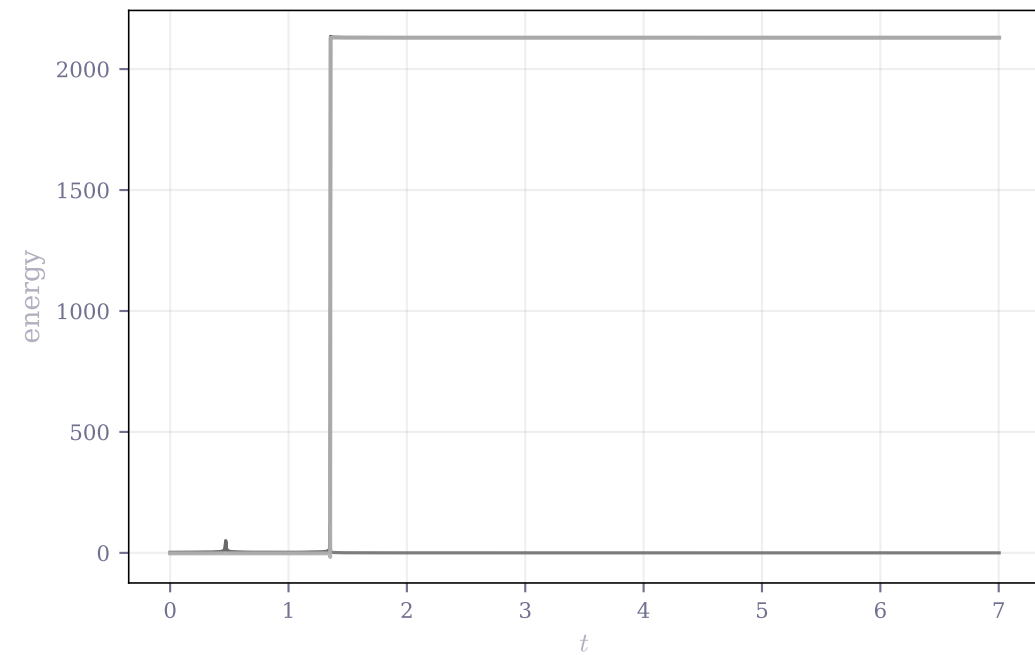

Figure-eight — virial ratio $\langle T \rangle / (-\langle V \rangle / 2) = 1.0000$

Butterfly I — virial ratio $\langle T \rangle / (-\langle V \rangle / 2) = 474.9726$

Butterfly II — virial ratio $\langle T \rangle / (-\langle V \rangle / 2) = 4067.8305$

Butterfly III — virial ratio $\langle T \rangle / (-\langle V \rangle / 2) = 2877.8172$
